FIA WORLD RX OF RĪGA-LATVIA ENVIRONMENTAL POLICY

FIA World RX of Riga-Latvia - the event, which will take place in Latvia for the seventh time (organised by RA Events), is always organized in an effort to achieve the highest level of quality in every nuance of the project and we are trying to serve this event as an example of good practice for others.

As thinking of and facing environmental issues in event organizing process, RA Events has set sustainability aim to reduce the negative impact on the environment by inviting all parties involved in FIA World RX of Rīga-Latvia to think about the future in the long run, make responsible decisions and act sustainably today. This event is proactively used as communication platform to inform competitors, media, personal, officials, spectators, cooperation partners, suppliers and other parties about the environmental issues and how to act right. And do it today.

To achieve the established aim for the event, it is necessary to be aware, evaluate and always control the impact on the environment, and therefore RA Events:

- closely follows all applicable regulatory requirements;
- measures risks that could appear in the scope of the activity ahead of time;
- continually improves environmental management;
- learns and adjust its operations based on the experiences provided through FIA environmental policy.

To fulfil this obligation, RA Events:

- promotes sustainability and environmental awareness and communicates it to all the parties;
- measures and monitors processes and evaluates gathered data;
- continually reduces the amount of resources used during the event;
- introduces new solutions to minimize the impact on environment.

FIA World RX of Rīga-Latvia environmental policy is communicated to all parties involved in this event, including information published on website and social media, as well as communicated to all our staff and management during various meetings and seminars.

FIA World RX of Rīga-Latvia environmental policy will be reviewed once a year.

Our team is convinced that we are given a choice, and today we choose a sustainable future.

Raimonds Strokšs
